

# The 3rd Shanghai Assembly on Cosmology and Structure Formation

## Friday, November 21, 2025

**Galaxies 5 (2:00 PM - 3:00 PM)**

time	[id] title	presenter
2:00 PM	[61] Collisional Formation of BDDGs from Progenitors with Weakened Gravitational Binding	WANG, Yi-Ying
2:15 PM	[32] Dependence of halo properties on central-satellite magnitude gaps through weak lensing measurements	YANG, Mingtao
2:30 PM	[40] Measuring Galaxy Conditional Luminosity Function (CLF) towards Lower Halo Mass and Higher Redshift ( $z \sim 1$ )	GAO, Ce
2:45 PM	[53] Improve the modeling of bulge formation through galaxy mergers in semi-analytic model	XIE, Lizhi
